A MISERLY FELLOW IS *Frelat* K

HE likes to save you money. He saves you money when you first buy him; he costs less than any other first class valve. He treats the current in your accumulator with niggardly care—and yet he is generous to a fault with the power he gives. With him a charge in your accumulator lasts twice as long as when you use ordinary bright emitter valves—and he costs less.

Truly a delightful fellow to meet. Your dealer will introduce him to you to-day; if he cannot, we will do so with pleasure. MEET HIM TO-DAY.

K. Detector 1·8-2 volt ·3 amp. 20-30 plate voltage

K. Amplifier 1·8-2 volt ·3 amp. 30-100 plate voltage

Both types. Price 4/11

TYPE D.P. THE POWER VALVE.

3·5-5 volt ·3 amp. 100-250 plate voltage.

Price 10/6 each.

**Mirror-Like Reproduction.
FRELAT.**

Type K. 2 volt. ·3 amp.

Faithful, accurate reproduction reflecting in the minutest detail all the skill and charm of the artistes of the æther. To the enthusiast, to the dilettante, the Frelat K. comes as a promise of purer, clearer, radio enjoyment at an economical cost. It cost less in the first instance; it costs less to operate, taking less than half the current demanded by the ordinary bright emitter—the economy of a dull emitter with the sturdiness of a bright emitter.

**3 POINTS OF
ECONOMY.**

The first cost of your accumulator is halved. Only a 2-volt accumulator is required as compared with the usual 4- or 6-volt accumulator.

The Frelat takes half the current demanded by the ordinary bright emitter.

You can buy 3 Frelats for the price usually paid for one. We guarantee every Frelat to give satisfaction.

Nu was er in Nederland een firma L. Zélander in Amsterdam die rond deze tijd veel Engelse radio's en radiomaterialen op de markt bracht. Dit kan nauwelijks toeval zijn.
